Locking Up Our Own James Forman, Jr. 2018-08-30 Winner of the 2018 Pulitzer Prize for General Non-Fiction Longlisted for the National Book Award One of the New York Times Book Review's 10 Best Books of 2017 Former public defender James Forman, Jr. is a leading critic of mass incarceration and its disproportionate impact on people of colour. In *Locking Up Our Own*, he seeks to understand the war on crime that began in the 1970s and why it was supported by many African American leaders in the nation's urban centres. Forman shows us that the first substantial cohort of black mayors, judges and police chiefs took office amid a surge in crime and drug addiction. Many prominent black officials, including Washington, DC mayor Marion Barry and federal prosecutor Eric Holder, feared that the gains of the civil rights movement were being undermined by lawlessness - and thus embraced tough-on-crime measures, including longer sentences and aggressive police tactics. In the face of skyrocketing murder rates and the proliferation of open-air drug markets, they believed they had no choice. But the policies they adopted would have devastating consequences for residents of poor black neighbourhoods. A former public defender, Forman tells riveting stories of politicians, community activists, police officers, defendants and crime victims. He writes with compassion about individuals trapped in terrible dilemmas - from the men and women he represented in court to officials struggling to respond to a public safety emergency. *Locking Up Our Own* enriches our understanding of why American society became so punitive and offers important lessons to anyone concerned about the future of race and the criminal justice system.

Doing School Denise Clark Pope 2008-10-01 This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

Marketing Graffiti Mike Saren 2017-12-01 Radical and unique in its approach and presentation, *Marketing Graffiti* turns the traditional marketing introduction on its head by helping students to understand the part they already play as 'consumers' in the marketing process. Most marketing textbooks tackle the subject as a business function – i.e. how to "do" marketing in companies and other organizations. *Marketing Graffiti* shows how marketing is not just a business function but a part of our culture, and one in which we are all active as part-time marketers. By rejecting managerially-driven structures in this way, Saren's approach makes marketing immediate and instantly recognizable as a process and a phenomenon in which we are already complicit. It helps readers to become aware of what they already know. Critically examining a wide range of products, businesses, technologies, information, services, ads, packaging and branding, Saren utilizes everyday images and phenomena to draw out the conceptual foundations of marketing from a social science and cultural studies perspective as something that we all experience in everyday life. This new edition of the first critical marketing textbook discusses the role new technologies (such as social media) play in marketing culture and how this can potentially place more power in the clicks of the consumer. It includes new, updated or expanded sections on market exclusion, the role of the consumer in innovation, space and place, pricing, consumer communities, collaborative consumption and social media marketing. Leading experts in these fields of research and marketing practice also contribute additional sections on these topics. This essential marketing guide is supported by a range of teaching support materials including the latest journal and online references, guides to further reading, teaching slides and test bank questions

How to Draw Cool Stuff Catherine Holmes 2017-06 "How to Draw Cool Stuff: Basics, Shading, Texture, Pattern and Optical Illusions" is the second book in the *How to Draw Cool Stuff* series. Inside you will find simple illustrations that cover the necessities of drawing cool stuff. Specific exercises are provided that offer step-by-step guidelines for drawing a variety of subjects. Each lesson starts with an easy-to-draw shape that will become the basic structure of the drawing. From there, each step adds elements to that structure, allowing the artist to build on their creation and make a more detailed image. Starting with the basic forms, the artist is provided a guide to help see objects in terms of simplified shapes. Instructions for shading to add depth, contrast, character and movement to a drawing are then covered. The varieties of texture and pattern that can be included in an artwork offer another layer of interest and depth to a design. These elements are necessary to indicate the way something looks like it feels in a work (texture) or creating the repetition of shapes, lines or colors (patterns). Illustrated optical illusions involve images that are sensed and perceived to be different from what they really are, showing examples of how the mind and the eyes can play tricks on each other. All you need is a piece of paper, a pencil and an eraser and you are ready to draw cool stuff. Once the drawing is complete, it can be colored, shaded or designed in any way you like to make it original. Following these exercises is a great way to practice your craft and begin seeing things in terms of simple shapes within a complex object.

Funds of Knowledge Norma Gonzalez 2006-04-21 The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. *Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms* is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

GRAFF COLOR MASTER Scape Martinez 2013-11-08 "Color communicates because color is powerful, & powerful color is more powerful still." --Scape Martinez In this hot-off-the-streets book, Scape Martinez shows you how to use color to bring beauty, meaning and life to graffiti art. To shout, shock and sing. To push the boundaries of art and communicate in a way that letter structure alone cannot. By example, you'll learn how to connect your own color choices in a meaningful way, making your art both deeply personal and highly effective. Check out Scape's improvisational creative process as he creates 12 works (his "personal cave paintings") on concrete and canvas, step by step, from concept to completion. Instruction and exercises help you choose the colors that work for you and your artwork, find your distinct voice, and keep it real. Dig into Scape's bag of tricks for creating a site-specific piece, mixing conventional can techniques with traditional acrylic painting skills, exploring transparent letters and letter abstraction, working with monochromatic color schemes, turning letters inside out, and lots more. It's time to let go of old graffiti truths, like the idea of mandatory black outline and static fill-ins. The new aesthetic urges you to take creative risks. Combine expressive letter styles with wild and intense color schemes that transform, roll and change throughout your piece. Improvise on the spot. Drive it to the next level!

Mend: A Story of Divorce Sophia Recca 2019-05-10 Mend: A Story of Divorce is the first in a series of graphic novels written by young adults for their peers. Sophia, the fourteen-year-old author and protagonist, tells the heart-wrenching story of her parents' divorce. She was just nine years old, happy and enjoying life with her mom, dad, and little brother in Las Vegas, Nevada. Unexpectedly, one night, a violent argument disrupted her sleep and shattered her life. The next morning, her parents told her the dreaded news—they were getting divorced. Her dad was moving to California, while Sophia and her brother would stay with their mom. Any child who has experienced the trauma of divorce will understand Sophia's reactions: First, she blamed herself. But then, she remembered a note a teacher once wrote on her report card, and was inspired to focus on bringing both parents back into her life. Even if they could not be under the same roof, she thought, they could still share in caring for her and her brother. Sophia's story will resonate with children (and adults) who have faced a split in their family, or who have friends dealing with divorce. The book includes helpful advice for parents, as well as a special Teacher's Corner page. Zuiker Press is proud to publish stories about important current topics for kids and adolescents, written by their peers, that will help them cope with the challenges they face in today's troubled world.

LA Graffiti Black Book David Brafman 2021-04-13 This collection of unique works by 150 Los Angeles graffiti and tattoo artists represents an unprecedented collaboration across the city's diverse artistic landscape. Many graffiti artists carry sketchbooks, called black books, and they ask crew members and others whose work they admire to inscribe their books with lettering or drawings. A few years ago, the Getty Research Institute invited artists, including Angst, Axis, Big Sleeps, Chaz, Cre8, Defer, EyeOne, Fische, Heaven, Hyde, Look, ManOne, and Prime, to consider the idea of a citywide graffiti black book. During visits to the Getty Center, the artists viewed rare books related to calligraphy and letterforms, including works by Albrecht Dürer and Leonardo da Vinci. The artists instantly recognized the connections to their own practices and were particularly drawn to a liber amicorum (book of friends), a form of autograph book popular in the seventeenth century. Passed from hand to hand, it was filled with signatures, poetry, and coats of arms, like a black book from another era. Inspired by this meeting of minds across centuries, these artists became both creators and curators, crafting their own pages and inviting others to contribute. Eventually 150 Los Angeles artists decorated 143 individual pages. These were bound together into an exquisite artists' book that became known as the Getty Graffiti Black Book. This publication reproduces each page from the original artists' book and recounts the story of an unprecedented collaboration across the diverse artistic landscape of Los Angeles.

Graffiti New York Eric Felibret 2009-10 Presents the history of graffiti art in New York City, detailing the concepts, aesthetics, ideals, and social structures that have served as a cultural blueprint for graffiti movements across the world.

Street Fonts Claudia Walde 2018-01-18 Classic graffiti lettering and experimental typographical forms lie at the heart of street culture and have long inspired designers in many different fields. But graffiti artists, who tend to paint the same letters of their tag again and again, rarely design complete alphabets. Claudia Walde has spent over two years collecting alphabets by 154 artists from 30 countries with a view to showing the many different styles and approaches to lettering within the graffiti and street art cultures. All of the artists have roots in graffiti. Some are world renowned such as 123 Klan (Canada), Faith47 (South Africa) and Hera (Germany); others are lesser known or only now starting to emerge. Each artist received the same brief: to design all 26 letters of the Latin alphabet within the limits of a single page of the book. How they approached this task and selected the media with which to express their ideas was entirely up to them. The results are a fascinating insight into the creative process.

Flip the Script Christian P. Acker 2013 Distinctive hand style lettering is an essential skill for artists and designers. Deftly executed hand crafted letter forms are a nearly forgotten art in an age of endless free fonts. Graffiti is one of the last reservoirs of highly refined, well practiced penmanship. The most reviled and persecuted form of Graffiti, the Tag, is seldom appreciated for the raw beauty of its skeletal letter forms. Most tags are removed immediately, and thus the casual viewer seldom has a chance to discern the difference between entry level and advanced hand styles. Within the pages of Flip the Script, author Christian Acker has systematically analyzed the best graffiti hand styles, contextualizing the work of graffiti writers from around the United States. Acker presents the various lettering samples in a clean organized format, giving the material a proper, formal treatment evoking classic typography books.

Equity by Design Mirko Chardin 2020-07-20 When it comes to the hard work of reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by "teachers" they mean legions of teachers working in close collaboration. After all, it's teachers who design students' learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students' lives. *Equity by Design* is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you'll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students (including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation "Every student," Mirko and Katie insist, "deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability." Consider *Equity by Design* a critical first step forward in providing that all-important

opportunity. “Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve.” ~Mirko Chardin and Katie Novak

The Brilliant History of Color in Art Victoria Finlay 2014-11-01 The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay’s quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have found its way into the hands of Cézanne. Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ochre, green earth, Indian yellow, lead white—no pigment from the artist’s broad and diverse palette escapes Finlay’s shrewd eye in this breathtaking exploration.

Graffiti Art Styles Lisa Gottlieb 2014-01-10 This book presents a classification system for graffiti art styles that reflects the expertise of graffiti writers and the work of art historian Erwin Panofsky. Based on Panofsky’s theories of iconographical analysis, the classification model is designed to identify the style of a graffiti art piece through its visual characteristics. Tested by image cataloguers in archives, libraries, and museums, the system assists information professionals in identifying the iconic styles of graffiti art pieces. It also demonstrates the power of Panofsky’s theories to provide access to non-representational or abstract art images. The result is a new paradigm for Panofsky’s theories that challenges the assumptions of traditional models. This innovative book is a valuable resource for anyone who wants to learn more about graffiti art and for information professionals concerned with both the practical and intellectual issues surrounding image access.

Educational Research and Innovation Fostering Students’ Creativity and Critical Thinking What it Means in School Vincent-Lancrin Stéphan 2019-09-24 Creativity and critical thinking are key skills for complex, globalised and increasingly digitalised economies and societies. While teachers and education policy makers consider creativity and critical thinking as important learning goals, it is still unclear to many what it means to develop these skills in a school setting. To make it more visible and tangible to practitioners, the OECD worked with networks of schools and teachers in 11 countries to develop and trial a set of pedagogical resources that exemplify what it means to teach, learn and make progress in creativity and critical thinking in primary and secondary education.
