RAF Wings Over Florida Willard Largent 2000 They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

Radar Instruction Manual United States. Maritime Administration 2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. [Complete Guide to Treadle Sewing Machines](#) Reuben O. Doyle 2016-12-04 As a sewing machine repair person for over twenty five years, I've seen almost every problem that can happen with your home sewing machine. I've seen people so frustrated with their new found treadle sewing machine that they were ready to set it aside for looks only, just because they couldn't figure out how to use or operate it. Normally the old treadles no longer have instruction books with them, therefore it's up to the owner to try to figure things out. Even a basic thing like putting on a new belt is an impossible task when you don't know where to begin and what steps to take to get it in the right position and secured properly. If you stop and think about it, the treadle machine is the machine all sewing machines of today were modeled after. The electric motor was added to take the place of the foot power of the treadle machines. The shuttle was changed from the bullet style to the present style of a small round flat shuttle directly under the feed dog and needle bar. I've had many requests to try to locate an instruction manual for treadle sewing machines, to no avail. After years of request after request for information on treadle sewing machines, I was finally talked into writing a book of general instruction for the treadle machine. Keep in mind that there are many different styles, brands and manufacturers of treadle sewing machines, and some are made in other countries. With that in mind, I could not include each of them specifically and cover the small differences they each may have, therefore this book is written in a "generic" style so that the information could be applied to any treadle machine.

The Innovation Killer Cynthia BARTON RABE 2006-07-17 "Knowledge is good," preaches the inscription under the statue of college founder Emil Faber in the film Animal House. But as valid as that declaration may be at a university, in the corporate world what passes for knowledge can be a killer. Companies and teams rely on "what we know" and "the way we do things here" to speed decision making and maintain a sense of order. But progress demands change, risk taking, and occasionally, revolution. Processes must be overhauled, assumptions challenged, taboos broken. But how do you do it? Who among the group will take responsibility for a brand new initiative or unorthodox decision? Who will be willing to stand up and say, in essence, that the emperor has no clothes? As much as we laud the concept of "thinking outside of the box," most of us think it 's a lot safer to stay inside. It 's time to call in a "zero-gravity thinker" who is not weighed down by the twin innovation killers -- GroupThink and its close cousin, ExpertThink. Such outsiders are in plentiful supply, whether from the department down the hall, the branch office, a consulting firm or even another company. Unburdened by all the nagging issues that plague even very effective groups, the outsider will know new ways around a problem, identify possibilities where none seemed to exist, and spot potential problems before they spin out of control. According to The Innovation Killer, the right zero gravity thinker will ideally possess the following traits: Psychological distance: the most important tool of the impartial observer, it enables him or her to maintain an open mind. Renaissance tendencies: a wide range of interests, experiences, and influences more readily inspires innovative approaches. Related expertise: strength in a relevant area may lead to "intersection points" at which solutions are often found. The book helps identify when and why you should call in a collaborator, where to find one, and how you and your team can start working with him or her. There are also strategies for turning yourself into a zero-gravity thinker when it 's simply not practical to bring in a true outsider. Knowledge is good, except when it trumps real innovation. Whether your team is too focused on the forest or can 't see past the trees, this book will help you add the perspective you need to make the great decisions that will move your company forward.

Disabled Village Children David Werner 1987 ... A book of information and ideas for all who are concerned about the well-being of disabled children. It is especially for those who live in rural areas where resources are limited ... Written by [the author] with the help of disabled persons and pioneers in rehabilitation in many countries, this book ... gives a wealth of clear, simple, but detailed information concerning most common disabilities of children: many different physical disabilities, blindness, deafness, fits, behavior problems, and developmental delay. It gives suggestions for simplified rehabilitation, low-cost aids, and ways to help disabled children find a role and be accepted in the community. Above all, the book helps us to realize that most of the answers for meeting these children's needs can be found within the community, the family, and in the children themselves. It discusses ways of starting small community rehabilitation centers and workshops run by disabled persons or the families of disabled children.-Back cover.

Women and the Colonial State Elsbeth Locher-Scholten 2000 Woman and the Colonial State deals with the ambiguous relationship between women of both the European and the Indonesian population and the colonial state in the former Netherlands Indies in the first half of the twentieth century. Based on new data from a variety of sources: colonial archives, journals, household manuals, children's literature, and press surveys, it analyses the women-state relationship by presenting five empirical studies on subjects, in which women figured prominently at the time: Indonesian labour, Indonesian servants in colonial homes, Dutch colonial fashion and food, the feminist struggle for the vote and the intense debate about monogamy of and by women at the end of the 1930s. An introductory essay combines the outcomes of the case studies and relates those to debates about Orientalism, the construction of whiteness, and to questions of modernity and the colonial state formation.
