Mobile Marketing Management Hongbing Hua 2019-03-18 With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service

concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.

Strategic Communication Theory and Practice Carl H. Botan 2017-12-18 A guide to strategic communication that can be applied across a range of subfields at all three levels—grand strategic, strategic, and tactical communication Communication is a core function of every human organization so when you work with communication you are working with the very core of the organization. Written for students, academics, and professionals, Strategic Communication Theory and Practice: The Cocreational Model argues for a single unified field of strategic communication based in the three large core subfields of public relations, marketing communication, and health communication, as well as strategic communicators working in many other subfields such as political communication, issues management, crisis communication, risk communication, environmental and science communication, social movements, counter terrorism communication, public diplomacy, public safety and disaster management, and others. Strategic Communication Theory and Practice is built around a cocreational model that shifts the focus from organizational needs and the messages crafted to achieve them, to a publics-centered view placing publics and their ability to cocreate new meanings squarely in the center of strategic communication theory and practice. The author—a noted expert in the field—outlines the theories, campaign strategies, common issues, and cutting edge challenges facing strategic communication, including the role of social media, ethics, and intercultural strategic communication. As the author explains, the term "strategic communication" properly refers only to the planned campaigns that grow out of research and understanding what publics think and want. This vital resource answers the questions of whether, and how, strategic-level skills can be used across fields, as it: Explores the role of theory and the cocreational meta-theory in strategic communication Outlines ethical practices and problems in the field Includes information on basic campaign strategies Offers the most recent information on risk communication, preparedness and terrorism communication, and employment in strategic communication Redefines major concepts, such as publics, from a cocreational perspective

Ethics for Managers Joseph Gilbert 2012-11-27 This book examines issues relating to ethical decision-making in the managerial context. Managers are paid to oversee the work of others, and in the course of their work, they often make decisions that impact other people. This book is intended to help managers, and students of management, reflect on the impact of their decisions, and to help them in making such decisions ethically. Ethics has to do with interpersonal or social

values, and the rules of conduct that derive from them. By the time an individual becomes a manager, he or she invariably has a sense of moral right and wrong. Author Joseph Gilbert examines the sources of this sense, and how it is shaped and altered by various influences. He lays the groundwork for discussion by delving into the meaning of ethics and its philosophical foundations, then exploring its application to the task of management. This balanced approach both makes clear the moral implications of actions taken by managers and provides some time-tested ways of thinking about moral issues when they arise. Without preaching or critiquing the reader's existing ethical sense, *Ethics for Managers* prepares the manager or student of business to adequately address the difficult decisions that will crop up during their career in an ethical and self-aware manner.

Cross-Cultural Management and Quality Performance Yomi Babatunde 2015-01-13 This book explores China's global competitiveness in the building of infrastructures with a particular interest in the resource-rich African countries. The book begins with a comprehensive literature review on total quality management (TQM) and national culture, followed by reviews of the construction industries in China and Nigeria. This provides better understanding of the linkages between TQM, based on the International Organization for Standardization's ISO 9000 quality management systems (QMS), and national culture, based on Emeritus Professor Geert Hofstede's national cultural dimensions. Premised on the culture-specificity and bi-directionality relationships between TQM and national culture, this book investigates the construction industries in China and Nigeria including their strengths, weaknesses, opportunities, and threats (SWOT) as well as an appraisal of their historical and emerging relationships. In its conceptual approach, this book presents different models in the lead up to its primary theoretical contribution of a quality management assessment model (QMAM) that was adopted during the study's field work. The book also presents relevant lessons relating to cross cultural management and quality performance not only to the Nigerians but also other foreign players in Nigeria's construction industry.

Open Access in Theory and Practice Stephen Pinfield 2020-07-09 *Open Access in Theory and Practice* investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice relationship. *Open Access in Theory and Practice* contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

Open Innovation Research, Management and Practice Joe Tidd 2013-10-24 The concept of open innovation has become increasingly popular in the management and policy literature on technology and innovation. However, despite the large volume of empirical work, many of the prescriptions being proposed are fairly general and not specific to particular contexts and contingencies. The proponents of open innovation are universally positive but research suggests that the specific mechanisms and outcomes of open innovation models are very sensitive to context and contingency. This is not surprising because the open or closed nature of innovation is historically contingent and does not entail a simple shift from closed to open as often suggested in the literature. Research has shown that patterns of innovation differ fundamentally by sector, firm and strategy. Therefore, there is a need to examine the mechanisms that help to generate successful open innovation. In this book, the authors contribute to a shift in the debate from potentially misleading general prescriptions, and provide conceptual and empirical insights into the precise mechanisms and potential limitations of open innovation research and management practice. Contents: Introduction: Why We Need a Tighter Theory and More Critical Research on Open Innovation (Joe Tidd) Taxonomies and Modes: Different Modes of Open Innovation: A Theoretical Framework and an Empirical Study (Valentina Lazzarotti and Raffaella Manzini) Advancing a Typology of Open Innovation (S C Ellis, Peter T Gianiodis and E Secchi) How to Balance Open and Closed Innovation: Strategy and Culture as Influencing Factors (Ellen Enkel and Karoline Bader) Context and Contingencies: The Role of Open Innovation in Dynamic Environments (Fiona Schweitzer, Kurt Gaubinger and Oliver Gassmann) A Conceptual Model of Open Innovation for New Product Development Projects: Towards a Contingency Theory (Hanna Bahemia and Brian Squire) Open Service Innovation: The Influence of Project Novelty (Joe Tidd and Kuo-Nan Hsieh) Exploring the Use of Open Innovation in Processes, Products and Services (Amy Huang and John Rice) Managing Open Innovation in Multinational Enterprises: Combining Open Innovation and R&D Globalization Literature (Wim Vanhaverbeke, Jingshu Du and Maximilian von Zedtwitz) Sector and Industry Studies: Measuring the Impact of Inbound Open Innovation Practices on Performance in Services (Anne-Laure Mention and Anna-Leena Asikainen) Generativity and Innovation in Smartphone Ecosystems (Björn Remneland-Wikhamn, Jan Ljungberg, Magnus Bergquist and Jonas Kuschel) Toward a Dynamic Perspective on Open Innovation: A Longitudinal Assessment of the Adoption of Internal and External Innovation Strategies in the Netherlands (Tom Poot, Dries Faems and Wim Vanhaverbeke) Investigating Inter-Industry Differences in the Implementation of Open Innovation (Tommaso Buganza, Davide Chiaroni, Gabriele Colombo and Federico Frattini) Limitations and Constraints of Open Innovation: Open Innovation: Old Ideas in a Fancy Tuxedo Remedy a False Dichotomy (Paul Trott and Dap Hartmann) Not for Everybody: Why Some Organisations Benefit More from Open Innovation than Others (Torsten Oliver Salge, Thomas Marc Bohné, Tomas Farchi and Erk Peter Piening) Positive and Negative Dynamics of Open Innovation (Michael M Hopkins, Joe Tidd and Paul Nightingale) Readership: Graduate students, researchers and practitioners in the field of open innovation and management. Key Features: This book challenges the claims

that open innovation represents a universal good practice This book provides vital insights into the mechanics of open innovation and its potential limitations Keywords: Innovation; Open Innovation; Technology Management; Product Development Reviews: "In sum, this interesting book illustrates that the simple dichotomy between open and closed approaches for innovation is not realistic, and that there are pitfalls to open innovation. This book can certainly be useful to managers trying to keep up with the fast changing environment and with the current challenges of innovation, but is more useful to academic scholars." New Frontiers in HRD Monica Lee 2004-07-31 Factors such as globalisation, restructuring, casualization of employment and the erosion of pension rights have led to massive tensions in contemporary organizations. By exploring the boundaries of the field of Human Resource Development this book asks where is HRD in the middle of all this and presents an innovative and challenging approach to HRD theory and practice. With contributions from a number of leading international scholars, the chapters draw upon a range of epistemologies and adopt a critically reflective perspective on the field. The chapters are divided into four sections moving from a critical perspective on the definition and boundaries of the field of HRD, through a re-thinking of the human-centred nature of HRD, and the organisational context within which HRD takes place, to, finally, perspectives on the future role of HRD in the changing knowledge economy. The book's main conclusion is that HRD remains a contested concept within the more broadly contested field of organisation and management theory. Yet this is neither a drawback nor weakness on the one hand, nor an advantage or strength on the other. Both threats and opportunities present themselves for the future growth of HRD as an academic field, and as an arena of professional practice
