

Modern Chinese Warfare 1795 1989 Warfare And History 1st Edition By Elleman Bruce A Published By Routledge Hardcover

If you ally infatuation such a referred Modern Chinese Warfare 1795 1989 Warfare And History 1st Edition By Elleman Bruce A Published By Routledge Hardcover books that will have enough money you worth, get the unquestionably best seller from us currently from several preferred authors. If you desire to comical books, lots of novels, tale, jokes, and more fictions collections are also launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every ebook collections Modern Chinese Warfare 1795 1989 Warfare And History 1st Edition By Elleman Bruce A Published By Routledge Hardcover that we will definitely offer. It is not in the region of the costs. Its approximately what you obsession currently. This Modern Chinese Warfare 1795 1989 Warfare And History 1st Edition By Elleman Bruce A Published By Routledge Hardcover, as one of the most operational sellers here will categorically be along with the best options to review.

Japanese-American Civilian Prisoner Exchanges and Detention Camps, 1941-45 Bruce A. Elleman 2006 This book considers the negotiation and conduct of civilian prisoner exchanges between the United States and Japan during the Second World War. Using recently released archival documents, this book examines the details of the diplomatic negotiations, the actual mechanics underlying the two successful exchanges, the reasons for the termination of the exchange program, and its final outcome.

Preparing for One War and Getting Another? Antulio Joseph Echevarria 2010-01-01 "This monograph examines the fundamental argument that America's adversaries are shifting more toward irregular methods due to the demonstrated prowess of the U.S. military at conventional warfare. This argument is based on what one might call a paradoxical logic, not unlike that described by Edward Luttwak in his classic work, *Strategy*. Among other things, the monograph concludes that few genuine paradoxes exist in war; most principles that appear paradoxical are completely linear. Moreover, those adversarial states and nonstate actors employing irregular methods today were doing so long before the U.S. military demonstrated its superiority at conventional warfare, and will likely continue to do so." --

China's Naval Operations in the South China Sea Bruce A. Elleman 2017-11-15 This book provides a history of the South China Sea conflict and lays out the stakes for each of the bordering states and China's interaction with them - namely, Vietnam, the Philippines, Brunei, Malaysia, Taiwan, and Indonesia; it also examines the U.S. government's role in the region. *China's Naval Operations in the South China Sea* is highly topical; it examines the evolving perception of the People's Republic of China's (PRC) of the South China Sea (SCS), and Beijing's accompanying maritime strategy to claim the islands and waters, particularly in the context of the strategies of the neighbouring stake-holding nations. In addition to long-standing territorial disputes over the islands and waters of the SCS, China and the other littoral states--Vietnam, the Philippines, Brunei, Malaysia, Taiwan, and Indonesia--have growing and often mutually exclusive interests in the offshore energy reserves and fishing grounds. Many other countries outside of the region worry about the protection of sea lines of communication for military and commercial traffic, oil tankers in particular. These differences have been expressed in the increasing frequency and intensity of maritime incidents, involving both naval and civilian vessels, sometimes working in coordination against naval or civilian targets. Each chapter on the littoral states closely examines that state's territorial claims to the islands and waters of the SCS, its primary economic and military interests in these areas, its views on the sovereignty disputes over the entire SCS, its strategy to achieve its objectives, and its views on the U.S. involvement in any and all of these issues.

Warfare and Society in Europe Michael S. Neiberg 2004 Combining a traditional survey of military history with a survey of social issues, Michael S. Neiberg examines warfare in Europe from the Fashoda conflict in modern-day Sudan to the recent war in Iraq.

International Competition in China, 1899-1991 Bruce A. Elleman 2015-04-10 China's recent economic reforms have opened its economy to the world. This policy, however, is not new: in the late nineteenth century, the United States put forward the Open Door Policy as a counter to European exclusive 'spheres of influence' in China. This book, based on extensive original archival research, examines and re-evaluates China's Open Door Policy. It considers the policy from its inception in 1899 right through to the post-1978 reforms. It relates these changes to the various shifts in China's international relations, discusses how decades of foreign invasion, civil war and revolution followed the destruction of the policy in the 1920s, and considers how the policy, when applied in Taiwan after 1949, and by Deng Xiaoping in mainland China after 1978, was instrumental in bringing about, respectively, Taiwan's 'economic miracle' and mainland China's recent economic boom. The book argues that, although the policy was characterised as United States 'economic imperialism' during the Cold War, in reality it helped China retain its sovereignty and territorial integrity.

China's Use of Military Force in Foreign Affairs Markus B. Liegl 2017-03-16 This book explains why China has resorted to the use of large-scale military force in foreign affairs. How will China use its growing military might in coming crisis and existing conflicts? This book contributes to the current debate on the future of the Asia-Pacific region by examining why China has resorted to using military force in the past. Utilizing fresh theoretical insights on the causes of interstate war and employing a sophisticated methodological framework, the book provides detailed analyses of China's intervention in the Korean War, the Sino-Indian War, China's border clashes with the Soviet Union and the Sino-Vietnamese War. It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation, as frequently claimed. Rather, the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances. When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships, it is argued that the People's Republic is still a status-seeking and thus highly status-sensitive actor. As a result, China's status ambitions should be very carefully observed and well taken into account when interacting with the PRC. This book will be of much interest to students of Chinese foreign policy, Asian politics, military and strategic studies and IR in general.

The Vietnamese War David Elliott 2016-04-15 A monumental work of research and analysis, this is a history of the Vietnam War in a single province of the Mekong Delta over the period 1930-1975. More precisely, it is a study of the Vietnamese dimension of the "Vietnam War," focusing on the revolutionary movement that became popularly known as the "Viet Cong." There are several distinctive features to this study: (1) it provides an explanation for the paradox of why the revolutionary movement was so successful during the war, but unable to meet the challenges of postwar developments; (2) it challenges the dominant theme of contemporary political analysis which assumes that people are "rational" actors responding to events with careful calculations of self-interest; (3) it closely examines province-level documentation that casts light on a number of important historical controversies about the war. No other history of the Vietnam War has drawn on such a depth of documentation, especially firsthand accounts that allow the Vietnamese participants to speak directly to us.

The Cold War in East Asia Xiaobing Li 2017-09-13 This textbook provides a survey of East Asia during the Cold War from 1945 to 1991. Focusing on the persistence and flexibility of its culture and tradition when confronted by the West and the US, this book investigates how they intermesh to establish the nations that have entered the modern world. Through the use of newly declassified Communist sources, the narrative helps students form a better understanding of the origins and development of post-WWII East Asia. The analysis demonstrates how East Asia's position in the Cold War was not peripheral but, in many key senses, central. The active role that East Asia played, ultimately, turned this main Cold War battlefield into a "buffer" between the United States and the Soviet Union. Covering a range of countries, this textbook explores numerous events, which took place in East Asia during the Cold War, including: The occupation of Japan, Civil war in

China and the establishment of Taiwan, The Korean War, The Vietnam War, China's Reforming Movement. Moving away from Euro-American centric approaches and illuminating the larger themes and patterns in the development of East Asian modernity, The Cold War in East Asia is an essential resource for students of Asian History, the Cold War and World History.

War and Geopolitics in Interwar Manchuria Chi Man Kwong 2017-02-28 In War and Geopolitics in Interwar Manchuria Kwong Chi Man revisits the National Revolution of 1925-1928 by revealing the central importance of geopolitics in the civil wars in China during the interwar period.

Ottoman Warfare, 1500-1700 Rhoads Murphey 2006-06-19 A study of the Ottoman military machine and its successes in Europe, North Africa and the Middle East in a period when they were feared by western European states and the focus of much military concern. The book is intended for undergraduate courses in early modern history, Ottoman history, history of the Middle East and North Africa, and for military historians.

Deadly Dreams J. Y. Wong 2002-11-07 Wong argues that the opium trade played a large causative role in the Anglo-Chinese Arrow War. Historical Dictionary of Modern China (1800-1949) James Z. Gao 2009-06-16 The Historical Dictionary of Modern China (1800-1949) offers a concise but comprehensive examination of the political, military, economic, social, and cultural development of modern China. Instead of focusing merely on the political elites of China, this reference covers a variety of significant persons, including women and ethnic minorities; new historical concepts; cultural and educational institutions; and economic activities. Drawing on newly-available records, including a large mass of governmental and family archives, the narratives presented reveal new facts, offer a new interpretation in accordance with China's modernization process during the late Qing period, and a revisionist perspective on the Republican history. The chronology records not only political and military events but also other experiences of the Chinese people. The bibliography gives prominence to current literature on China's drive towards modernization and appendixes provide the reader with detailed information on China's cultural and economic transformation.

Medieval Chinese Warfare 300-900 David Graff 2003-09-02 Shortly after 300 AD, barbarian invaders from Inner Asia toppled China's Western Jin dynasty, leaving the country divided and at war for several centuries. Despite this, the empire gradually formed a unified imperial order. Medieval Chinese Warfare, 300-900 explores the military strategies, institutions and wars that reconstructed the Chinese empire that has survived into modern times. Drawing on classical Chinese sources and the best modern scholarship from China and Japan, David A. Graff connects military affairs with political and social developments to show how China's history was shaped by war.

Japanese-American Civilian Prisoner Exchanges and Detention Camps, 1941-45 Bruce Elleman 2006-04-18 The important and previously undocumented event in the history of the Second World War: the negotiation of 'prisoner' exchanges between the United States and Japan during 1941 to 1943, is examined here by Bruce Elleman. Approximately 7000 American citizens had been arrested by the Japanese authorities while visiting Japan as tourists, conducting business, teaching English or carrying out missionary work. The same amount of Japanese citizens living illegally in the United States had to be repatriated to secure the Americans' release. Challenging the conventional perceptions regarding the role and justification of the detention camp, this insightful book addresses questions regarding the diplomatic agreement between Japan and the United States, the Japanese-American detention camps and the role of one of the most successful minority groups in the United States today: the Japanese-Americans.

Mao's Military Romanticism Shu Guang Zhang 1995 "Breaks new ground in analyzing China's decision to enter the war and its subsequent struggle to hold its own against the world's most powerful nation. Should stand for some time as the standard comprehensive treatment of China in the Korean War". -- William Stueck, author of The Korean War. "Offers provocative insights into Mao's thinking about strategy, tactics, and the human costs of warfare. Highly recommended". -- John Lewis Gaddis, author of The Long Peace.

War, Politics and Society in Early Modern China, 900-1795 Peter Lorge 2006-03-29 This comprehensive survey of Chinese military history is the only book in English to span the significant years from 900 - 1795. Peter Lorge questions current theories on China's relationship to war, and argues that war was the most important tool used by the Chinese in building and maintaining their empire. Emphasizing the relationship between the military and politics, chapters are organized around specific military events and, Lorge argues, the strength of territorial claims and political impact of each dynasty were determined by their military capacity. Ideal as a course adoption text for Asian military studies, this is also valuable for students of Chinese studies, military studies and Chinese history.

The War for a Nation Susan-Mary Grant 2014-09-03 The War for a Nation provides a brief introduction to the American Civil War from the perspective of military personnel and civilians who participated in the conflict. Susan-Mary Grant brings the war, its many battles, and those who fought them - male and female, black and white - to the center of a riveting narrative that is accessible to general readers and students of American history. The War for a Nation explains, in a clear narrative structure, the war's origins, its battles, the expansion of the Union, the struggle for emancipation, and the following saga of Reconstruction. By drawing its examples from primary source documents, first-hand accounts, and scholarly research, The War for a Nation introduces readers to the human-interest aspects as well as the historiographical debates surrounding what was the most destructive war ever fought on American soil.

Military Force and Elite Power in the Formation of Modern China Edward A. McCord 2014-01-21 The China we know today emerged at the end of a long period of internal rebellions, civil wars, foreign invasions, and revolutionary insurrections that stretched across the nineteenth century to the mid-point of the twentieth. This book explores one important consequence of this situation—the increased role of military force in the determination of elite social, political, and economic power, and presents fascinating case studies of the warlords, militia leaders, and military officers who benefited from this. Examining the intersection of military force and elite power in the formative years of modern Chinese history, this book highlights just how important military force was to elite power in nineteenth- and early twentieth-century China in a context of frequent warfare and political turmoil. It shows that the way in which military empowerment unfolded and who exactly was empowered, depended heavily on shifting military and political conditions, and each case confirms the extent to which military force emerged as a consistently significant determinant of elite power across this period. Indeed, the transformative effect of military force on social and political structures of power revealed by these studies sheds distinctive light on the prevalence, and wide-ranging impact, of military conflicts in this period. In turn, these studies also provide a particular perspective on the fluid boundaries of, as well as the constraints on, elite power in Chinese society in a time of intense social and political change. This book makes an important contribution to our understanding of the rise of modern China, and provides a keen insight into impact of war on the country, as such, it will be welcomed by students and scholars interested in Chinese history, Asian history, and military history more broadly.

Piracy and Maritime Crime: Historical and Modern Case Studies Bruce A. Ellerman 2010 Piracy is a basic and fundamental concern for all navies. From almost the beginning of state-sponsored navies, piracy suppression has been one of their major responsibilities -- when Julius Caesar was captured by pirates in 76 BCE, the first thing he did after paying the pirates' ransom and being released was to fit "out a squadron of ships to take his revenge." Despite piracy's importance and the continued frequency of piratical attacks, however, relatively few scholarly works have been written analyzing cases of modern piracy and piracy suppression in terms of varying strategic, policy, and operational decisions. This edited collection of case studies attempts to fill this gap. There have been a number of important historical studies that have dealt with the subjects of piracy and piracy suppression. Books written from the point of view of those wishing to end piracy have tended to focus on legal issues, including the rights of victims, the procedures and decisions of Admiralty courts in punishing pirates, and the capture of piracy ships as prizes. Others have looked at the existence of piracy in terms of one particular place or time period, with the Barbary Coast and the Caribbean Sea claiming disproportionate shares of attention. Pirates are often romanticized; Forbes magazine has recently listed history's top-earning pirates, including Samuel "Black Sam" Bellamy at US\$120 million (2008 dollars), Sir Francis Drake at US\$115 million, and Thomas Tew at US\$103 million. More famous pirates, like Edward Teach (Blackbeard), came in far down the list, at tenth place, with only US\$12.5 million.

Moscow and the Emergence of Communist Power in China, 1925-30 Bruce Elleman 2009-01-30 This book examines the emergence of Communist power in China during the interwar period, focusing especially on the role of the Soviet Union and the 1927 Nanchang Uprising.

It describes the history behind the alliance between the Chinese Communists and Nationalists, the impact of the USSR's military and political advisers, and the success of the Northern Expedition that resulted in the April 1927 purge of the Communists from the Nationalist Party. It explores the debates between leading communists in Moscow, notably Stalin - who thought that China was ready in 1927 for an urban-based Communist revolution, similar to what had happened in Russia ten years before - and Trotsky who opposed it. It goes on to examine the seizure of power in Nanchang by the Communists, the establishment of China's first short-lived soviet republic, and the reasons why the soviet soon collapsed. It explains the consequences of the rising, including the adoption by the Communists of guerilla warfare, the foundation of China's second soviet, and after moving to northwest China during the 1930s, the rise of Communist power throughout all of mainland China which culminated in the establishment of the People's Republic of China in 1949. The book stresses the importance of the mythology that evolved around the Nanchang Uprising: since criticism of the Nanchang Uprising would open themselves up to accusations that they were Trotskyites, the Chinese Communists created the myth that the Nanchang Uprising was a success, and later dated the origins of the People's Liberation Army to this event.

Waves of Hope: the U. S. Navy's Response to the Tsunami in Northern Indonesia Bruce A. Elleman 2012-08-08 The powerful underwater earthquake that occurred off the coast of Sumatra on 26 December 2004 generated the most destructive tsunami ever recorded, drowning more than 150,000 people without warning in exposed littoral areas from Indonesia to South Africa. The destruction was particularly severe in the Aceh Province of Indonesia, at the northwestern tip of the island of Sumatra. There entire villages were destroyed within minutes as waves of thirty feet or more advanced far inland, while destruction of the main coastal highway made the entire region virtually inaccessible to Indonesian authorities ashore. In these extraordinary circumstances of human suffering, the U.S. Navy was able to play a key role in organizing what was to become a massive, multinational humanitarian relief operation, one based and executed virtually entirely "from the sea." Working closely with the Indonesian government and military, the Navy delivered, beginning within days of the disaster, vast quantities of emergency food and other supplies and provided on-the-spot emergency medical treatment to thousands of injured and displaced persons along the Aceh coast. Humanitarian relief has long been recognized as a mission of the American armed forces and of the U.S. Navy in particular. The scale and complexity of the tsunami's impact, however, posed particular and in some respects novel challenges to the Joint Task Force 536 (JTF 536) that was created to deal with the situation, not least of them the requirement imposed on it to operate exclusively from an improvised "sea base," to use a term that has gained some currency in recent discussions of naval missions and capabilities. In *Newport Paper 28, Waves of Hope: The U.S. Navy's Response to the Tsunami in Northern Indonesia*, historian Bruce A. Elleman provides the first comprehensive history and analysis of what would become known as Operation UNIFIED ASSISTANCE. Elleman, a research professor in the Department of Maritime History at the Naval War College, has produced a valuable and indeed unique study, one that makes use of a variety of internal Navy documents, oral histories, and interviews with a number of senior naval officers, including the then Chief of Naval Operations, Admiral Vern Clark. It is to be hoped that it will prove of immediate benefit to planners in the naval and joint worlds of the U.S. military, as well as to those of other nations potentially interested in exploiting its lessons to improve their own capabilities in this frequently neglected yet vital—indeed, life-saving—military mission.

Samurai, Warfare and the State in Early Medieval Japan Karl F. Friday 2004-08-02 Karl Friday, an internationally recognised authority on Japanese warriors, provides the first comprehensive study of the topic to be published in English. This work incorporates nearly twenty years of on-going research and draws on both new readings of primary sources and the most recent secondary scholarship. It overturns many of the stereotypes that have dominated views of the period. Friday analyzes Heian -, Kamakura- and Nambokucho-period warfare from five thematic angles. He examines the principles that justified armed conflict, the mechanisms used to raise and deploy armed forces, the weapons available to early medieval warriors, the means by which they obtained them, and the techniques and customs of battle. A thorough, accessible and informative review, this study highlights the complex casual relationships among the structures and sources of early medieval political power, technology, and the conduct of war.

War and Nationalism in China, 1925-1945 Hans J. Van de Ven 2003 Offers a new interpretation of the Chinese nationalists, placing their war of resistance against Japan in the context of their efforts to establish control over their own country and providing a critical reassessment of regional Allied Warfare.

Rethinking Military History Jeremy Black 2014-12-10 *Rethinking Military History* is a bold new 'thought book' that reconsiders military history at the beginning of the twenty-first century. The chapters provide a valuable and concise survey of the main themes in the study of military history from 1500 to the present day as Jeremy Black reveals the main trends in the practice and approach to military history and proposes a new manifesto for the subject to move forward. This must-read study demonstrates the limitations of current approaches, including common generalizations, omissions, and over-simplifications. Engaging theoretical discussions, with reference to specific conflicts, suggest how these limitations can be remedied and adapted, whilst incorporating contributions from other disciplines. *Rethinking Military History* is essential reading for all those with an interest in military history, and all who wish to take part in moving the discipline forward.

Warfare, State and Society on the Black Sea Steppe, 1500-1700 Brian Davies 2014-04-04 This crucial period in Russia's history has, up until now, been neglected by historians, but here Brian L. Davies' study provides an essential insight into the emergence of Russia as a great power. For nearly three centuries, Russia vied with the Crimean Khanate, the Polish-Lithuanian Commonwealth and the Ottoman Empire for mastery of the Ukraine and the fertile steppes above the Black Sea, a region of great strategic and economic importance - arguably the pivot of Eurasia at the time. The long campaign took a great toll upon Russia's population, economy and institutions, and repeatedly frustrated or redefined Russian military and diplomatic projects in the West. The struggle was every bit as important as Russia's wars in northern and central Europe for driving the Russian state-building process, forcing military reform and shaping Russia's visions of Empire.

Modern Chinese Warfare, 1795-1989 Bruce A. Elleman 2005-07-28 Why did the Chinese empire collapse and why did it take so long for a new government to reunite China? *Modern Chinese Warfare, 1795-1989* seeks to answer these questions by exploring the most important domestic and international conflicts over the past two hundred years, from the last half of the Qing empire through to modern day China. It reveals how most of China's wars during this period were fought to preserve unity in China, and examines their distinctly cyclical pattern of imperial decline, domestic chaos and finally the creation of a new unifying dynasty. By 1989 this cycle appeared complete, but the author asks how long this government will be able to hold power. Exposing China as an imperialist country, and one which has often manipulated western powers in its favour, Bruce Elleman seeks to redress the views of China as a victimised nation.

At the President's Pleasure Sally K Burt 2015-05-29 *At the President's Pleasure* re-examines Franklin Roosevelt's leadership of US diplomacy with China in World War II using new perspectives on aspects of Sino-US relations.

Sino-Soviet Crisis Politics Richard Wich 1980

The Mughal Empire at War Andrew de la Garza 2016-04-28 The Mughal Empire was one of the great powers of the early modern era, ruling almost all of South Asia, a conquest state, dominated by its military elite. Many historians have viewed the Mughal Empire as relatively backward, the Emperor the head of a traditional warband from Central Asia, with tribalism and the traditions of the Islamic world to the fore, and the Empire not remotely comparable to the forward looking Western European states of the period, with their strong innovative armies implementing the "military revolution". This book argues that, on the contrary, the military establishment built by the Emperor Babur and his successors was highly sophisticated, an effective combination of personnel, expertise, technology and tactics, drawing on precedents from Europe, the Middle East, Central Asia and India, and that the resulting combined arms system transformed the conduct of warfare in South Asia. The book traces the development of the Mughal Empire chronologically, examines weapons and technology, tactics and operations, organization, recruitment and training, and logistics and non-combat operations, and concludes by assessing the overall achievements of the Mughal Empire, comparing it to its Western counterparts, and analyzing the reasons for its decline.

China's War in Korea Xiaobing Li 2019-11-05 This book re-visits the history of the Korean War of 1950-1953 from a Chinese perspective, examining Chinese strategy and exploring why China sent three million troops to Korea, in Mao's words, to "defend the homeland and safeguard the country"—giving rise to what became the war's common name in China. It also looks into the relatively neglected historical

factors which have redefined China's security concerns and strategic culture. Using newly available sources from China and the former Soviet Union, the book considers how interactive the parameters of defense changes were in a foreign war against Western powers, how flexible Chinese strategy was in the context of its intervention, and how expansive its strategic cultural repertoire was at the crucial moment to "defend the country." Providing a re-examination of China's military decisions and strategy evolution, this text narrates the story of successive generations of Chinese leaders and provides a key insight into security issues in China and Northeast Asia today.

The Evolution of Operational Art John Andreas Olsen 2011 Broadly defined as the grey area between strategy and tactics, operational art spans the theory and practice of planning and conducting campaigns and major operations aimed at accomplishing strategic and operational objectives in a given theatre of operations. An intermediate link between strategy and tactics has always existed, but a distinct concept that encompasses a systematic and deliberate plan of campaign for major operations is a mere two hundred years old. Based on country specific case-studies, this book describes how the concepts that underpin operational art originated, how they received practical expression in various campaigns, and how they developed over time. The point of departure is the campaigns of 'the God of War', Napoleon Bonaparte. The book then proceeds with chapters on the evolution of operational art in Prussia / Germany, the Soviet Union / Russia, the United Kingdom, United States, Israel, and China. The final chapter deals with the future of operational art in irregular warfare. Theory is critical to refining and improving existing methods of applying operational warfare, and its importance cannot be overstated; however, to be useful, theory and its accompanying vocabulary must be combined with a proper examination of historical trends and practical experience. The present volume attempts to achieve that combination. This book is a project of the Oxford Leverhulme Programme on the Changing Character of War.

The Making of the Modern Chinese Navy Bruce A. Elleman 2019-08-31 'The Making of the Modern Chinese Navy' includes 14 historical case studies that help to illuminate a number of special characteristics of the modern-day Chinese navy most Chinese naval officers perhaps take for granted, including a belief in the Mandate of Heaven, tributary system and the fear of 'losing face' either in a diplomatic setting or by risking valuable equipment in battle. Ethnic and language differences, regional loyalties and political mistrust potentially exacerbate these problems. Special peculiarities include the Mongol dual-officer diarchy that led to the political commissar system utilized by the People's Liberation Army. Outside influences, such as blockade, sanctions or embargoes, can exert a profound impact on China, just as foreign intervention or, equally important, a decision not to intervene, can often determine the outcome of major maritime events. [NP] The 14 case studies discuss many of these characteristics, while the Conclusion examines all case studies together and places them in a historical perspective. 'The Making of the Modern Chinese Navy' assesses which of these historical characteristics and peculiarities are still present in full force in China and which ones may no longer have as great an impact on the contemporary Chinese navy.

Naval Coalition Warfare Bruce A. Elleman 2007-09-12 This is the first scholarly book examining naval coalition warfare over the past two centuries from a multi-national perspective. Containing case studies by some of the foremost naval historians from the US, Great Britain, and Australia, it also examines the impact of international law on coalitions. Together these collected essays comprise a comprehensive examination of the most important naval coalitions of the nineteenth and twentieth centuries. Chapters are arranged chronologically, beginning with the Napoleonic Wars, and ending with the second Gulf War, and each makes use of new research and methodologies to address the creation of the coalition, its actions, and its short- and long-term repercussions. The editors draw contemporary lessons from the book's historical case studies. These findings are used to discuss the likelihood and character of future naval coalition; for example, the likelihood and possible outcome of an anti-PRC coalition in defence of Taiwan. *Naval Coalition Warfare* will be of great interest to students of naval history, strategic studies, international history and international relations in general.

China at War Xiaobing Li 2012-01 This comprehensive volume traces the Chinese military and its experiences over the past 2,500 years, describing clashes with other kingdoms and nations as well as internal rebellions and revolutions. * Approximately 300 A-Z entries covering China's military tradition over the past 2,500 years * Contributions from over 50 distinguished international scholars from China, Taiwan, Hong Kong, Japan, Great Britain, Canada, and the United States * Maps of China and Asia, depicting provinces and major cities, major battles and campaigns, and disputed borders * Photographs of military leaders, soldiers, weapon systems, and battle grounds * Selected multicultural bibliography of research materials from the field of military history, both in English and in Chinese * A helpful appendix of Chinese dynasties

Insurgency In The Modern World Bard E. O'Neill 2019-04-02 While all instances of insurgency have elements in common, the circumstances that precipitate them and the forms they take vary immensely. The editors of this book synthesize the literature on insurgency to provide an analytical framework that outlines categories of insurgent movements (secessionist, revolutionary, restorational, reactionary, conse

Corruption and Anticorruption in Modern China Qiang Fang 2018-12-20 This collection examines corruption and abuses of power in China from the end of the imperial period to the present. The interdisciplinary group of contributors examines how the Chinese Communist Party has adapted to economic and social changes while continuing to control the law, state, and mass media.

War and Militarism in Modern Japan Guy Podoler 2009-08-01 A considerable amount of writing has been published on Japan at war in WWII. Scholars have been revisiting the Russo-Japanese War of 1904-5. This volume examines Japan's twentieth-century approach to war and militarism in a wider perspective, bringing hitherto unexamined new themes and subject-matter under scrutiny up to the present day.

The Origins of the First United Front in China Tony Saich 1991 Sneevliet (alias Maring) played a crucial role in the early years of the Chinese communist movement. This source publication of his personal archives provides new information on the development of the communist movement, the Soviet role in China, the communist labour movement and relations between the communists and nationalists.

The Battle for Manchuria and the Fate of China Harold M. Tanner 2013-03-18 "A well-organized and excellently researched work" (*H-War*) on one of the crucial battles of China's civil war. In the spring of 1946, Communists and Nationalist Chinese were battled for control of Manchuria and supremacy in the civil war. The Nationalist attack on Siping ended with a Communist withdrawal, but further pursuit was halted by a ceasefire brokered by the American general, George Marshall. Within three years, Mao Zedong's troops had captured Manchuria and would soon drive Chiang Kai-shek's forces off the mainland. Did Marshall, as Chiang later claimed, save the Communists and determine China's fate? Putting the battle into the context of the military and political struggles fought, Harold M. Tanner casts light on all sides of this historic confrontation and shows how the outcome has been, and continues to be, interpreted to suit the needs of competing visions of China's past and future. "A genuine addition to our knowledge about this battle and the Chinese civil war in general." —Mark Wilkinson, Virginia Military Institute

Modern China Bruce A. Elleman 2019-01-29 Now in a fully updated edition, this accessible text provides a balanced history of modern China in a global context. The authors focus especially on China's culture, warfare, and immediate neighbors and provide a unique comparative approach to bridge the cultural divide separating Chinese history from Western readers trying to understand it.
