The Cumulative Book Index 1999

Accounting Education Research Richard M.S. Wilson 2015-04-10 An annual prize is awarded for the best paper appearing in Accounting Education: an international journal, and this book contains the prize-winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build on research findings from the broader domain of education scholarship and embrace a wide array of topics - including: curriculum development, pedagogic innovation, improving the quality of learning, and

assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences; ethics and moral intensity; and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report - whether comparatively or longitudinally. This book is a compilation of papers originally published in Accounting Education: an international journal.

Health At Every Size Linda Bacon 2010-02-02 Fat isn't the problem. Dieting is the problem. A society that rejects anyone whose body shape or size doesn't match an impossible ideal is the problem. A medical establishment that equates "thin" with "healthy" is the problem. The solution? Health at Every Size. Tune in to your body's expert guidance. Find the joy in movement. Eat what you want, when you want, choosing pleasurable foods that help you to feel good. You too can feel great in your body right now—and Health at Every Size will show you how. Health at Every Size has been scientifically proven to boost health and self-esteem. The program was evaluated in a government-funded academic study, its data published in well-respected scientific journals. Updated with the latest scientific research and even more powerful messages, Health at Every Size is not a diet book, and after reading it, you will be convinced the best way to win the war against fat is to give up the fight.

Handbook on Human Service Administration Jack Rabin 1988-05-27

Introducing theories and concepts essential for human services administration, this book covers organization theory and management, budgeting and financial management, personnel administration and labor relations, laws and regulations, innovation and change, and data administration and information systems. The author explores bioethics and managing "Babies Doe," legal right to refuse treatment, nursing home payments, and more. He applies important general concepts to specific concerns such as organizational structure and service delivery arrangements, internal financial planning, innovations in drug services delivery, and implementing medical information systems.

The book is ideal for MBA and advanced undergraduate and graduate finance students taking courses in mergers & acquisitions, corporate restructuring, and corporate strategy. Over 90 cases

American Book Publishing Record 2000

Lectures on the Psychology of Women Joan C. Chrisler 2012-12-21 Designed as a supplement in courses on the psychology of women, the psychology of gender, and gender-role development, this collection of short, accessible lectures, written by experienced and committed teachers, spotlights topics that often receive less in-depth coverage in core textbooks. While topically arranged to align with standard texts, each favorite lecture stands alone: essentially instructors can assign the readings to meet their own course needs. Among the student-friendly features are the informal writing styles, with each author speaking directly to the reader; questions and ideas that encourage critical thinking; and biographical statements and photographs that introduce each contributor. The authors represent a variety of personal backgrounds and experiences, but they believe in the importance of gender equality. To that point, the book addresses common feminist themes, including the social construction of gender, power, the value of diversity, inclusive language, the global status of women, and the value of social activism.

College and University Business Administration Deirdre McDonald Greene 1992

Structure and Interpretation of Computer Programs - 2nd Edition Harold Abelson Structure and Interpretation of Computer Programs by Harold Abelson and Gerald Jay Sussman is licensed under a Creative Commons Attribution-NonCommercial 3.0 License.

The Experience Economy B. Joseph Pine 1999 Future economic growth lies in the value of experiences and transformations--good and services are no longer enough. We are on the threshold, say authors Pine and Gilmore, of the Experience Economy, a new economic era in which all businesses must orchestrate memorable events for their customers. The Experience Economy offers a creative, highly original, and yet eminently practical strategy for companies to script and stage the experiences that will transform the value of what they produce. From America Online to

Walt Disney, the authors draw from a rich and varied mix of examples that showcase businesses in the midst of creating personal experiences for both consumers and businesses. The authors urge managers to look beyond traditional pricing factors like time and cost, and consider charging for the value of the transformation that an experience offers. Goods and services, say Pine and Gilmore, are no longer enough. Experiences and transformations are the basis for future economic growth, and The Experience Economy is the script from which managers can begin to direct their own transformations.

Artificial Intelligence in Accounting and Auditing Miklos A. Vasarhelyi 1989 The articles in this volume offer an introductory overview of artificial intelligence in accounting and auditing. They seek to provide a logically arranged and usable handbook of artificial intelligence, decision support, and expert systems in accounting and auditing.

Mergers, Acquisitions, and Other Restructuring Activities, 4E Donald DePamphilis 2007-11-26 Dr. Donald DePamphilis explains the real-world of mergers, acquisitions, and restructuring based on his academic knowledge and personal experiences with over 30 such deals himself. The 99 case studies span every industry and countries and regions worldwide show how deals are done rather than just the theory behind them, including cross-border transactions. The interactive CD is unique in enabling the user to download and customize content. It includes an Excel-based LBO model and an M&A Structuring and Valuation Model in which readers can insert their own data and modify the model to structure and value their own deals. CD also real options applications and projecting growth rates. Student Study Guide on CD contains practice problems/solutions, powerpoint slides outlining main points of each chapter, and selected case study solutions. Credit Risk Measurement Anthony Saunders 2002-10-06 The most cutting-edge read on the pricing, modeling, and management of credit risk available The rise of credit risk measurement and the credit derivatives market started in the early 1990s and has grown ever since. For many professionals, understanding credit risk measurement as a discipline is now more important than ever. Credit Risk Measurement, Second Edition has been fully revised to reflect the latest thinking on credit risk measurement and to provide credit risk professionals with a solid understanding of the alternative approaches to credit risk measurement. This readable guide discusses the latest pricing, modeling, and management techniques available for dealing with credit risk. New chapters highlight the latest generation of credit risk measurement models, including a popular class known as intensity-based models. Credit Risk Measurement, Second Edition also analyzes significant changes in banking regulations that are impacting credit risk measurement at financial institutions. With fresh insights and updated information on the world of credit risk measurement, this book is a must-read reference for all credit risk professionals. Anthony Saunders (New York, NY) is the John M. Schiff Professor of Finance and Chair of the Department of Finance at the Stern School of Business at New York University. He holds positions on the Board of Academic Consultants of the Federal Reserve Board of Governors as well as the Council of Research Advisors for the Federal National Mortgage Association. He is the editor of the Journal of Banking and Finance and the Journal of Financial Markets, Instruments and Institutions. Linda Allen (New York, NY) is Professor of Finance at Baruch College and Adjunct Professor of Finance at the Stern School of Business at New York University. She also is author of Capital Markets and Institutions: A Global View (Wiley: 0471130494). Over the years, financial professionals around the world have looked to the Wiley Finance series and its wide array of bestselling books for the knowledge, insights, and techniques that are essential to success in financial markets. As the pace

of change in financial markets and instruments quickens, Wiley Finance continues to respond. With critically acclaimed books by leading thinkers on value investing, risk management, asset allocation, and many other critical subjects, the Wiley Finance series provides the financial community with information they want. Written to provide professionals and individuals with the most current thinking from the best minds in the industry, it is no wonder that the Wiley Finance series is the first and last stop for financial professionals looking to increase their financial expertise.

Accounting for Managers Paul M. Collier 2003-09-12 Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.
