Why Nations Fail Daron Acemoglu 2012-03-20 Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? *Why Nations Fail* will change the way you look at—and understand—the world.

Battle Hymn of the Tiger Mother Amy Chua 2011-12-06 A lot of people wonder how Chinese parents raise such stereotypically successful kids. They wonder what Chinese parents do to produce so many math whizzes and music prodigies, what it's like inside the family, and whether they could do it too. Well, I can tell them, because I've done it... Amy Chua's daughters, Sophia and Louisa (Lulu) were polite, interesting and helpful, they had perfect school marks and exceptional musical abilities. The Chinese-parenting model certainly seemed to produce results. But what happens when you do not tolerate disobedience and are confronted by a screaming child who would sooner freeze outside in the cold than be forced to play the piano? *Battle Hymn of the Tiger Mother* is a story about a mother, two daughters, and two dogs. It was supposed to be a story of how Chinese parents are better at raising kids than Western ones. But instead, it's about a bitter clash of cultures, a fleeting taste of glory, and how you can be humbled by a thirteen-year-old. Witty, entertaining and provocative, this is a unique and important book that will transform your perspective of parenting forever.

Sociology David M. Newman 2016-01-08 In *Sociology: Exploring the Architecture of Everyday Life*, Eleventh Edition, David M. Newman continues to show students how to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their take-for-granted personal experiences. With his approachable writing style and lively personal anecdotes, the author's goal since the first edition has been the same: to write a textbook that "reads like a real book." Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of them; it is a human creation that is planned, formed, maintained, or altered by individuals. Using vivid prose, current examples, and fresh data, this text presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

Exploring Inequality: A Sociological Approach Jenny M. Stuber 2021-09-28 Now Published by SAGE! In *Exploring Inequality: A Sociological Approach*, author Jenny M. Stuber examines the socially constructed nature of our identities, the processes by which we acquire them, prejudice and privilege, and the unequal outcomes they produce within institutions. By employing both micro-level and macro-level perspectives, as well as integrating intersectional analysis in every chapter, this text provides a solid and effective framework for understanding social diversity and inequality. The updated Second Edition features a strong introductory chapter reviewing key theories and concepts, real-world examples, social problems and their solutions, and better visuals to help students gain a comprehensive understanding of social inequality. Stuck in Place Patrick Sharkey 2013-05-15 In the 1960s, many believed that the civil rights movement's successes would foster a new era of racial equality in America. Four decades later, the degree of racial inequality has barely changed. To understand what went wrong, Patrick Sharkey argues that we have to understand what has happened to African American communities over the last several decades. In *Stuck in Place*, Sharkey describes how political decisions and social policies have led to severe disinvestment from black neighborhoods, persistent segregation, declining economic opportunities, and a growing link between African American communities and the criminal justice system. As a result, neighborhood inequality that existed in the 1970s has been passed down to the current generation of African Americans. Some of the most persistent forms of racial inequality, such as gaps in income and test scores, can only be explained by considering the neighborhoods in which black and white families have lived over multiple generations. This multigenerational nature of neighborhood inequality also means that a new kind of urban policy is necessary for our nation's cities. Sharkey argues for urban policies that have the potential to create transformative and sustained changes in urban communities and the families that live within them, and he outlines a durable urban policy agenda to move in that direction.

Inside Graduate Admissions Julie R. Posselt 2016-01-11 How does graduate admissions work? Who does the system work for, and who falls through its cracks? More people than ever seek graduate degrees, but little has been written about who gets in and why. Drawing on firsthand observations of admission committees and interviews with faculty in 10 top-ranked doctoral programs in the humanities, social sciences, and natural sciences, education professor Julie Posselt pulls back the curtain on a process usually conducted in secret. "Politicians, judges, journalists, parents and prospective students subject the admissions policies of undergraduate colleges and professional schools to considerable scrutiny, with much public debate over appropriate criteria. But the question of who gets into Ph.D. programs has by comparison escaped much discussion. That may change with the publication of *Inside Graduate Admissions*...While the departments reviewed in the book remain secret, the general process used by elite departments would now appear to be more open as a result of Posselt's book." —Scott Jaschik, *Inside Higher Ed* "Revealing...Provide[s] clear, consistent insights into what admissions committees look for." —Beryl Lief Benderly, *Science*

Machine Habitus Massimo Airoidi 2021-12-13 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

War in the Nineteenth Century Jeremy Black 2013-04-26 This book provides an accessible and up-to-date account of the rich military history of the nineteenth century. It takes a fresh approach, making novel links with conflict and coercion, and moving away from teleological emphases. Naval developments and warfare are included, as are social and cultural dimensions of military activity. Leading military historian Jeremy Black offers the reader a twenty-first century approach to this period, particularly through his focus on the dynamic drive provided by different forms of military goals, or "tasking". This allows echoes with modern warfare to come to the fore and provides a fuller understanding of a period sometimes considered solely as background to the total war of 1914-45. Alongside state-to-state warfare and the move toward "total war", Black's emphasis on different military goals gives due weight to trans-oceanic conflict at the expense of non-European. Irregular, internal and asymmetric war are all considered, ranging from local insurgencies to imperial expeditions, and provide a deliberate shift from Western-centricity. At the very cutting edge of its field, this book is a must read for all students and scholars of military history and its related disciplines.

Determined to Succeed? Michelle Jackson 2013-01-23 In many countries, concern about socio-economic inequalities in educational attainment has focused on inequalities in test scores and grades. The presumption has been that the best way to reduce inequalities in educational outcomes is to reduce inequalities in performance. But is this presumption correct? *Determined to Succeed?* is the first book to offer a comprehensive cross-national examination of the roles of performance and choice in generating inequalities in educational attainment. It combines in-depth studies by country specialists with chapters discussing more general empirical, methodological, and theoretical aspects of educational inequality. The aim is to investigate to what extent inequalities in educational attainment can be attributed to differences in academic performance between socio-economic groups, and to what extent they can be attributed to differences in the choices made by students from these groups. The contributors focus predominantly on inequalities related to parental class and parental education.

Handbook of Research in Education Finance and Policy Helen F. Ladd 2014-12-17 Sponsored by the Association for Education Finance and Policy (AEFP), the second edition of this groundbreaking handbook assembles in one place the existing research-based knowledge in education finance and policy, with particular attention to elementary and secondary education. Chapters from the first edition have been fully updated and revised to reflect current developments, new policies, and recent research. With new chapters on teacher evaluation, alternatives to traditional public schooling, and cost-benefit analysis, this volume provides a readily available current resource for anyone involved in education finance and policy. The Handbook of Research in Education Finance and Policy traces the evolution of the field from its initial focus on school inputs and revenue sources used to finance these inputs, to a focus on educational outcomes and the larger policies used to achieve them. Chapters show how decision making in school finance inevitably interacts with decisions about governance, accountability, equity, privatization, and other areas of education policy. Because a full understanding of important contemporary issues requires inputs from a variety of perspectives, the Handbook draws on contributors from a number of disciplines. Although many of the chapters cover complex, state-of-the-art empirical research, the authors explain key concepts in language that non-specialists can understand. This comprehensive, balanced, and accessible resource provides a wealth of factual information, data, and wisdom to help educators improve the quality of education in the United States.

People's Science Ruha Benjamin 2013-05-22 Stem cell research has sparked controversy and heated debate since the first human stem cell line was derived in 1998. Too frequently these debates devolve to simple judgments—good or bad, life-saving medicine or bioethical nightmare, symbol of human ingenuity or our fall from grace—ignoring the people affected. With this book, Ruha Benjamin moves the terms of debate to focus on the shifting relationship between science and society, on the people who benefit—or don't—from regenerative medicine and what this says about our democratic commitments to an equitable society. People's Science uncovers the tension between scientific innovation and social equality, taking the reader inside California's 2004 stem cell initiative, the first of many state referenda on scientific research, to consider the lives it has affected. Benjamin reveals the promise and peril of public participation in science, illuminating issues of race, disability, gender, and socio-economic class that serve to define certain groups as more or less deserving in their political aims and biomedical hopes. Under the shadow of the free market and in a nation still at odds with universal healthcare, the socially marginalized are often eagerly embraced as test-subjects, yet often are unable to afford new medicines and treatment regimes as patients. Ultimately, Ruha Benjamin argues that without more deliberate consideration about how scientific initiatives can and should reflect a wider array of social concerns, stem cell research—from African Americans' struggle with sickle cell treatment to the recruitment of women as tissue donors—still risks excluding many. Even as regenerative medicine is described as a participatory science for the people, Benjamin asks us to consider if "the people" ultimately reflects our democratic ideals.

Envisioning Criminology Michael D. Maltz 2015-06-09 This book covers research design and methodology from a unique and engaging point of view, based on accounts from influential researchers across the field of Criminology and Criminal Justice. Most books and articles about research in criminology and criminal justice focus on how the research was carried out: the data that were used, the methods that were applied, the results that were achieved. While these are all important, they do not present a complete picture. Envisioning Criminology: Researchers on Research as a Process of Discovery aims to fill that gap by providing nuance—the "back story" of why researchers selected particular problems, how they approached those problems, and how their background, training, and experience affected the approaches they took. As the contributions in this book demonstrate, research is not a cut-and-dried process, as all too many methods books imply, but a living, breathing—and in some ways quirky—process that is influenced by non-"scientific" factors. The path taken by a researcher is important, and an appreciation of his or her background, experience, knowledge—and the setbacks and triumphs of performing the research—provides a much more complete picture of how research is done. The twenty-eight chapters in this book describe the back stories of their authors, which serve to enlighten readers about the interplay between the personal and the methodological. While primarily aimed as a textbook, this work will also be of interest to researchers in Criminology and Criminal Justice, and related Social and Behavioral Science fields as an account of how seminal researchers in the field developed their key contributions.

Immigrant Vulnerability and Resilience María Aysa-Lastra 2015-03-31 This book explores how the current sustained economic slow-down in North America and Europe has increased immigrant vulnerability in the labor market and in their daily lives. It details the ways this global recession has affected the immigrants themselves, their identities, as well as their countries of origin. The book presents an interdisciplinary dialogue as well as offer a transatlantic comparative perspective. It first focuses on the immediate effects of the Great Recession on immigrants' employment. Next, it connects the experience of immigrants in the labor market with their experiences in the social arena in receiving societies. Coverage also explores the effects of the economic downturn on transnational practices, remittances and return of Latin American migrants to their countries of origin. This volume will be of great interest to faculty and graduate students who are interested in international migration studies from the fields of sociology, economics, anthropology, geography, political sciences, and other social sciences. It will also be of interest to professionals and policy makers working on international migration policy and the general public interested on the topic.

Handbook of the Sociology of Education in the 21st Century Barbara Schneider 2018-10-10 This handbook unifies access and opportunity, two key concepts of sociology of education, throughout its 25 chapters. It explores today's populations rarely noticed, such as undocumented students, first generation college students, and LGBTQs; and emphasizing the intersectionality of gender, race, ethnicity and social class. Sociologists often center their work on the sources and consequences of inequality. This handbook, while reviewing many of these explanations, takes a different approach, concentrating instead on what needs to be accomplished to reduce inequality. A special section is devoted to new methodological work for studying social systems, including network analyses and school and teacher effects. Additionally, the book explores the changing landscape of higher education institutions, their respective populations, and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways. Written by leading sociologists and rising stars in the field, each of the chapters is embedded in theory, but contemporary and futuristic in its implications. This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them.
