STILL HOT! Kaye Adams 2020-10-15 Every menopause has its own story. It's time we told them. . . . The menopause. What even is it? One big theme unites Still Hot!'s 42 stories - that, somehow, the world doesn't ready us for this. The menopause - let alone the perimenopause - simply isn't talked about; instead, it's reduced to a comic hot flush. More and more of us are proudly stepping free of the menopausal closet, but the Big M is still a conversation whispered below the radar. No one tells you it will be like this. No one prepares you for it. That silence is lifting, slowly. So let's be bold, let's overshare. Let's find solidarity among Still Hot!'s myriad voices - wise, rebellious, measured, fierce, upfront - telling how the menopause is not just one story, but many. Telling, in fact, that this is not the menopause, it is YOUR menopause. Being BRAVE(TM) Cindy Benning 2022-08-19 Do others think you have it all together, while inside you are struggling with the feeling that you will never be good enough? Perhaps you are thriving in some areas but really struggling in others. Do you wonder how it is possible to do so well in one aspect of life but be on a fail loop in another? While our professional and personal lives on the surface may seem separate, the emotions and negative thoughts borne of our life's experiences and past programming may be calling the shots in both domains, preventing us from unlocking our full potential as leaders—and as human beings. Being BRAVE: A Journey of Self-Discovery into Leadership will help you discover your authentic values and show you how to live them by separating your ego from your true self. You will learn how to recognize the thoughts behind your emotions and determine what is true and what is not. You will learn how to break through the barriers holding you back from being the truest version of yourself and a leader who acts from a place of "being." Through personal memoir, the author shares her personal and professional experiences over her thirty-year career and the twists and turns of her own journey of self-discovery that led to her developing the BRAVETM leadership model. By applying the five core principles of BRAVETM leadership, you can become the type of leader this world needs: one who is benevolent, respectful, authentic, vulnerable, emotionally conscious—and truly, wholly you.

The Change Germaine Greer 2018-08-14 An updated edition of Germaine Greer's revolutionary discussion of menopause, which the New York Times Book Review called "a brilliant, gutsy, exhilarating, bruising, exasperating fury of a book." A quarter of a century after the first publication of Germaine Greer's now canonical look at women's experience later in life, the renowned feminist and prolific author updates and expands her essential book, *The Change*. Despite improvements over the last few years, discussions about menopause are still hampered by a huge variance in conventional wisdom about what happens, when it happens, when it can be said to be over, and how to deal with it. After decades, the same misinformation and ineffective methods are still being widely touted and proliferating at an alarming rate due to the rise of the Internet. In this updated edition of her groundbreaking book, Greer debunks stubborn myths and presents a vital new perspective on the emotional and physical changes—including up-to-date medical details—women face today when they go through what's known as "the change." Greer also addresses cultural changes that surround female aging today, launching a clear and necessary protest against the notion that women should shrink into the background as they grow older. She argues that menopause marks the point in a woman's life when she should be able to stop apologizing and bask in the freedom and joy that come with her later years. Witty, wise, and timely, this new edition of *The Change* offers a crucial twenty-first-century guide to the change that every woman faces.

Cultural Studies PAULA A AUTOR TREICHLER 1992 The most ambitious and broadly international collection on cultural studies ever published, this book is destined to shape research and teaching through the 1990s and beyond. It arrives at a time of high visibility for cultural studies but a time as well when cultural studies' long oppositional history is in danger—particularly in the United States—of being taken up and assimilated into the ongoing, apolitical, academic enterprise. In an effort to disrupt this process, Cultural Studies interrogates the contemporary commitments of the field: its historical and intellectual positions, political and scholarly preoccupations, and the kinds of interventions it aims for now and in the future. Featuring essays by such prominent cultural theorists as Tony Bennett, Homi Bhabha, Donna Haraway, bell hooks, Constance Penley, Janice Radway, Andrew Ross, and Cornel West, Cultural Studies offers numerous specific cultural analyses while simultaneously defining and debating the common body of assumptions, questions, and concerns that have helped create the field. The topics addressed include race and minority discourses; ethnicity and postcolonialism; postmodernism; feminism; cultural policy; the place of history in cultural studies; the politics of representation; popular culture; aesthetics; ethics; and technology. At the same time Cultural Studies explores the cultural work performed by such diverse forms of cultural production as rock music, Chicano art, detective novels, African-American writing, the AIDS epidemic, architecture, reproductive freedom, *sati* Star Trek fandom, and New Age technology. Numerous contributors interrogate their own theoretical and methodological commitments, examining the place of representation, narrative, identity, language, and textual criticism in their work. -- Publisher description.

[Flash Count Diary](#) Darcey Steinke 2019-06-18 "Many days I believe menopause is the new (if long overdue) frontier for the most compelling and necessary philosophy; Darcey Steinke is already there, blazing the way. This elegant, wise, fascinating, deeply moving book is an instant classic. I'm about to buy it for everyone I know." —Maggie Nelson, author of *The Argonauts* A brave, brilliant, and unprecedented examination of menopause Menopause hit Darcey Steinke hard. First came hot flashes. Then insomnia. Then depression. As she struggled to express what was happening to her, she came up against a culture of silence. Throughout history, the natural physical transition of menopause has been viewed as something to deny, fear, and eradicate. Menstruation signals fertility and life, and childbirth is revered as the ultimate expression of womanhood. Menopause is seen as a harbinger of death. Some books Steinke found promoted hormone replacement therapy. Others encouraged acceptance. But Steinke longed to understand menopause in a more complex, spiritual, and intellectually engaged way. In *Flash Count Diary*, Steinke writes frankly about aspects of Menopause that have rarely been written about before. She explores the changing gender landscape that comes with reduced hormone levels, and lays bare the transformation of female desire and the realities of prejudice against older women. Weaving together her personal story with philosophy, science, art, and literature, Steinke reveals that in the seventeenth century, women who had hot flashes in front of others could be accused of being witches; that the model for Duchamp's famous *Étant donné*s was a post-reproductive woman; and that killer whales—one of the only other species on earth to undergo menopause—live long post-reproductive lives. *Flash Count Diary*, with its deep research, open play of ideas, and reverence for the female body, will change the way you think about menopause. It's a deeply feminist book—honest about the intimations of mortality that menopause brings while also arguing for the ascendancy, beauty, and power of the post-reproductive years.

Welcoming All That We Are Billie Rogers 2022-02-15 When women come together, unique and powerful magic happens. We gather to tell the truth about our lives, to be authentic with one another, to sing, to vision, to drum, to dance, to make art, to organize, to cry, to recover and heal, to raise our voices, to make good trouble, to solve problems, to innovate, to lead, to mourn, to weave a blanket or build a new world. For millennia women have gathered in circles, in council and boardrooms, around cook pots and quilts, as royals and as slaves, in public and in secret, around fires and funeral pyres, during menses and menopause, as maidens, mothers, and elders, in PTAs and carpools, at churches and synagogues, temples and shrines, mosques and kivas, among standing stones, and in meadows. Everywhere women are, they find a way to gather. Why is it important for women to come together? In a world where women's voices have too often been silenced, diminished, invalidated, punished, ridiculed, and more, we need places where we can be ourselves without editing, and without fear of retribution. In societies and communities where women are honored and elevated, we still need places to gain inspiration and courage, where we can be genuine and welcomed for ALL that we are. We need spaces where women's ways of inner knowing and intuition are valued, where we can experiment with creative spiritual and secular practices, where we can share our mistakes and victories and learn from each other's life experiences. It can be difficult for women in today's world to find the natural opportunities to gather that were built in for previous generations. Fewer women attend organized religious services, more women work outside of the home, and families and often friends live in different cities. The sheer volume of activity and information overload that make up many modern women's lives means that spending dedicated meaningful time with other women can require that we formally set aside time for a women's group.

Everything You Need to Know About the Menopause (but were too afraid to ask) Kate Muir 2022-01-20 An eye-opening, no-holds-barred guide to the perimenopause and menopause written by campaigner, journalist and documentary-maker Kate Muir. Everything You Need to Know About the Menopause (and were too afraid to ask) is the thinking woman's guide to the menopause, bringing you answers to all those questions that have been hidden behind a veneer of misplaced shame, bad science and centuries of patriarchy. · What's the perimenopause and when will it strike? (It's sooner than you think) · What's happening to my body - and my mind? · Why can't I stop thinking about sex in perimenopause? · How do I get my sex drive back after menopause? · How do I look after my body and brain when my hormones disappear? Muir draws on interviews with the leading medical experts in the field, interlaced with her own tumultuous journey through the menopause and the personal stories of women from all walks of life, sharing their varied experiences and hard-earned wisdom. Muir also questions why the current medical establishment is getting the menopause so wrong, as she debunks the myths that surround hormone replacement therapy and exposes the sloppy science and hysterical headlines that have had a negative impact on women's health for the last twenty years. It's essential that we understand the biology of our own bodies during this critical period that will define the latter half of our lives. With the help of a panel of doctors, scientists and health experts, Muir unpacks the science behind hormones and ageing, and takes a close look at the different options available for treating both body and mind during the profound changes that take us into midlife and beyond. What she discovers is that both symptoms and treatment are far more extensive and diverse than we might expect. The menopause is the whole package, and the treatment needs to be too, with impacts as wide ranging as preventing Alzheimer's, boosting sex drive and protecting mental health. This ground-breaking guide is a social, cultural and scientific exploration into a criminally overlooked and under-discussed phenomenon that will affect one billion of us by 2025.
