Think and Grow Rich Napoleon Hill 2005-08-18 Think and Grow Rich has been called the "Granddaddy of All Motivational Literature." It was the first book to boldly ask, "What makes a winner?" The man who asked and listened for the answer, Napoleon Hill, is now counted in the top ranks of the world's winners himself. The most famous of all teachers of success spent "a fortune and the better part of a lifetime of effort" to produce the "Law of Success" philosophy that forms the basis of his books and that is so powerfully summarized in this one. In the original Think and Grow Rich, published in 1937, Hill draws on stories of Andrew Carnegie, Thomas Edison, Henry Ford, and other millionaires of his generation to illustrate his principles. In the updated version, Arthur R. Pell, Ph.D., a nationally known author, lecturer, and consultant in human resources management and an expert in applying Hill's thought, deftly interweaves anecdotes of how contemporary millionaires and billionaires, such as Bill Gates, Mary Kay Ash, Dave Thomas, and Sir John Templeton, achieved their wealth. Outmoded or arcane terminology and examples are faithfully refreshed to preclude any stumbling blocks to a new generation of readers.

Think, Feel and Grow Rich Hank Seitz 2012-12-20 I want to share with you a secret... it's the secret to success, wealth, and heavenly riches. This secret is based on Napoleon Hill's original manuscript of his classic book, "Think, and Grow Rich". Hill wrote this masterpiece after spending many years studying the most successful men of his time; these men included Andrew Carnegie, George Eastman, Woodrow Wilson, F. W. Woolworth, and many others. Hill discovered that there were 13 basic principles that all of the wealthiest men had in common. Of course his original book has been republished, revised, and edited – and then I discovered the original manuscript – the inspiration and basis for this book. It was in the original manuscript that I finally uncovered Napoleon's "hidden secret". In the original manuscript he had the word "vibration" written 37 times, yet the edited version took all of them out and this was the missing secret. I was inspired to write the book as Napoleon left out one main point about our feelings and how they vibrate to communicate with our Source/God and thus bringing us all of our desires. I spent countless hours poring over the original manuscript and adding additional instruction to teach you how to harness these vibrations – aka FEELINGS! So that you too, can learn how to think, FEEL, and grow rich.

"Anything the mind can conceive and believe, it can achieve." Within this one line is distilled a success formula so simple that anyone can apply it—and yet so demanding that only a minority of the population ever fully lives it out. Upon it was built a success philosophy that explains how human desires can be translated into material reality, a framework that rests upon the power of thoughts to seek expression in physical form. Through this singular concept, the world's wealthiest and most successful individuals—rich in money, relationships, power, peace of mind, and social standing—have built and maintained their prosperity. It is the foundational principle of Napoleon Hill's Science of Success program, an achievement philosophy that effectively helped end the Great Depression and that has since made more millionaires, cultural icons, and thought leaders than any other. Hill was born in 1883 in a one-room cabin on the Pound River in Wise County, Virginia. He began his writing career at age thirteen as a mountain reporter for small-town newspapers. In 1908, as a young special investigator for a nationally known business magazine, he was sent to interview the great steel magnate Andrew Carnegie. During that interview, Carnegie shared the secrets that had enabled him to acquire hundreds of millions of dollars—a magic law of the human mind, a little-known psychological principle that was amazing in its power. Believing that this magic formula should be shared with those who did not have the time or resources to discover it on their own, Carnegie tasked Hill with spending twenty years or more developing this principle into a philosophy of personal success. This research would be conducted without pay; Carnegie merely provided Hill with access to over five hundred of America's greatest business leaders in order to test his success formula. In 1937, after twenty-nine years of research and writing, Hill published Think and Grow Rich, which contains the thirteen success principles that form the core of the Science of Success. Since its release, it has sold over one hundred million copies worldwide. No literary work in the personal development genre has had a greater creative impact than Think and Grow Rich.
